Connections© Volume XIII

Dear First Name,

More and more, Americans are turning to natural and herbal remedies as a means of preventive medicine. While the effects of Kava Kava, St. Johns

Wort, or Ginkgo Biloba aren't my area of expertise, I can say that you need to notify your dentist about any medications that you are taking.

Whether prescription, herbal, over-the counter, or otherwise, your dentist absolutely needs to know about everything you're taking. Different combinations of medications can have different effects on your body and those effects can influence your dental treatment. Always make sure to give your dentist a full medical history.

If you have any questions, please do not hesitate to contact us today.

Sincerely,

Dr. Bright White
ABC Dentistry

This Connections© communication was brought to you by ABC Dentistry, the area's premier cosmetic and family dentist. Visit us on the web at www.ABCDentistry.com or call 123.456.7890.
